

**SYNLAWN®**

**Safe. Clean. Green.**

# The synthetic solution

SYNLawn® is more than just artificial grass; it's a lifestyle. Our synthetic turf not only saves money but also conserves natural resources with little to no maintenance required, allowing for more free time to enjoy the important things in your life.

## Quality guarantee

SYNLawn is a vertically integrated manufacturer, meaning, we make each component of the products we sell. Made in America using only the highest quality standards, we are so confident you will love our products, we back them with an industry-leading warranty up to 15-years.

SYNLAWN

## Perfect lawn

No watering. No mowing. No more weekends spent working on the yard. Our low-maintenance, Earth friendly artificial grass can help eliminate the cost of lawn maintenance as well as reduce your monthly utility bills. You may even qualify to get money back from your local water authority.

**BioCel™ technology** replaces petroleum based polymers with renewable resources.

**Heatblock™ technology** keeps surface temperatures up to 20% cooler than similar turf.

**EnviroLoc™ backing** 'Locks' in turf fibers for lasting beauty and longer life expectancy.

## Urban living

Grass in non-traditional spaces such as your roof, deck or patio are great examples of how SYNlawn® can transform once unused areas into functional outdoor living spaces. Our products allow grass in places once thought not possible and last longer than wood or composite decking.

SYNLawn manufactures the only artificial grass product with a Class 1 fire rating.

## Safe for pets

Pets stay clean. Pets stay healthy. SYN Lawn® products help protect against disease and other harmful pests. Best of all, no more muddy paws in the house no matter what the weather may be like. With our Pet installation options, we can create the perfect pet paradise specifically for your pets.

## Safe for kids

Safety first. Safety built in. Best of all, no more grass stains. Under swings and at the foot of slides are two great examples of high-traffic areas difficult to maintain and keep safe. We've developed consistent, low-abrasive play surfaces allowing for safe use of ANY type of playground equipment.

For maximum safety, ask about  
IPEMA™ Certified Playground  
Installation options.

## Practice better

We've worked with some of Golf's greatest minds to research and develop the most realistic performing synthetic golf grasses available for putting, collar, fringe, rough, fairway and tee-line. Create your own private golfing oasis just like the pros use, right in your own backyard.

*Lawry Perry*

*"The ball comes out, just the way I want it to.  
Just like it's a real green."*

Our GreensMaster™ Certified installations ensure the best conditions for your game.

*Tom Watson*

# 'Green' all over

SYNLawn® is green on top, in the middle and even underneath. Beyond the color, SYNLawn goes a long way toward environmental sustainability, taking measurable steps to be truly "green". Made in the USA, our biobased products are 100% recyclable, using renewable and recycled materials during the manufacturing process. Using SYNLawn can reduce your carbon footprint by conserving water, eliminating emissions from lawn equipment, and lowering the impact on landfills due to its long life expectancy.

SYNLawn's exclusive EnviroLoc™ Backing System has an enhanced multi-layer component system that "locks" in durable turf fibers, extending the product's lifecycle. Engineered using BioCel™ technology, the EnviroLoc™ Backing System replaces a large portion of petroleum-based polymers with bio-based polymers created from soybean plants (a rapidly renewable resource). We then add Celceram™ (a recycled product of coal combustion) for superior strength and dimensional stability. Together these biobased technologies provide an environmentally responsible approach to artificial grass that conserves Earth's natural resources and will look great for years to come.
