SYN LAWN®

artificial grass never looked more natural

HOME

SYNLawn has always manufactured top quality golf products with superior nylon fibers and strict quality control standards. Our internal labs continuously test SYNLawn products for wearability, resiliency and overall workmanship. However, when it comes to understanding true golf performance we knew we had to find an expert.

Partnering with short game guru, physicist, and former NASA scientist, Dave Pelz, we began testing all aspects of SYNLawn artificial putting greens. The first series of testing began with a direct comparison of our synthetic golf grass to natural grass found on professional golf courses. Ball reaction for putting, chipping and approach shots were measured and analyzed by Dave Pelz and the Pelz Golf Institute on both natural and SYNLawn artificial grass surfaces.

Data was collected using precise instrumentation and equipment exclusively designed by the Pelz Golf Institute. All products and installation techniques were thoroughly researched, studied, and measured at SYNLawn's state-of-the-art test facility at the Pelz Golf Institute in Austin, Texas. The test facility was designed to study and enhance design characteristics for all SYNLawn Golf products and installation techniques for the most realistic golf experience possible.

After a year long of testing, analysis, and development, SYNLawn and Dave Pelz introduce the most complete, realistic golf experience in the artificial turf industry. Every aspect of the game comes to life in your own backyard with the SYNLawn Golf system designed by Dave Pelz.

GreensMaster™ Certified Installation

Quality and performance are of the utmost importance when installing a putting green for our customers. We know our customers are making a significant investment for their homes when purchasing a putting green. To ensure our quality standards are met for every putting green we install, SYNLawn and Dave Pelz have developed the GreensMaster certification program for all SYNLawn locations.

The SYNLawn Greensmaster™ certification program encompasses a rigorous set of standards to which all of our installers are judged. To be certified in the SYNLawn Greensmaster™ program our installation crews must be trained in all techniques and demonstrate their abilities over time. Only after they have proven their techniques and have shown the ability to perfectly install putting greens with smooth seams, natural undulations, proper surrounding fringe and course style bunkers will they be certified a SYNLawn Greensmaster™. To maintain their certification they must pass periodic inspections of their putting green installations and continue training as new products and techniques are developed.

GOLF PRODUCT SELECTOR GUIDE

PUTTING SURFACES

Product	Manufacturer Recommended	*Green Speed	Putting Performance	Chipping Performance	Pitching Performance	Pitching Performance with Dave Pelz ShotStopper	Price	Manufacturer Warranty
SYNLawn Precision Putt	✓							up to 15 years*
SYNLawn Classic Putt	✓							up to 15 years*
SYNLawn Classic Pitch	✓							up to 15 years*

*Green Speed = 1 is slowest, 5 is fastest.

Putting Performance = the fastest, truest ball roll across the surface.

Chipping Performance = the ability to 'hold' a shot under 25 yards, any shots that stay below your shoulder.

Pitching Performance = the ability to 'hold' a chip shot under 50 yards.

Shot Stopper System = recommended for holding shots over 50 yards.

ROUGH

Product	Aesthetics	Durability	Price	Manufacturer Warranty
SYNRye 251				up to 15 years*
SYNzoysia 256				up to 15 years*
SYNLawn 156				up to 15 years*
SYNLawn 256				up to 15 years*
SYNLawn 356				up to 15 years*

Any SYNLawn Landscaping products will work for a 'Rough' on a golf project. However, the products recommended above provide the most realistic match between putting green and fringe surfaces.

FRINGE

Product	Aesthetics	Durability	Price	Manufacturer Warranty
SYNBermuda 211				up to 15 years*
SYNRye 211				up to 15 years*
SYNTipede 214				up to 15 years*

Aesthetics = 1 is poor match, 5 is best match in terms of realistic aesthetics.

FAIRWAY

Product	Aesthetics	Durability	Price	Manufacturer Warranty
SYNBermuda 211				up to 15 years*

SYNBermuda 211 is the only Fairway product SYNLawn recommends.

SYNLawn Tee Strike is the only Tee Line surface that SYNLawn recommends.

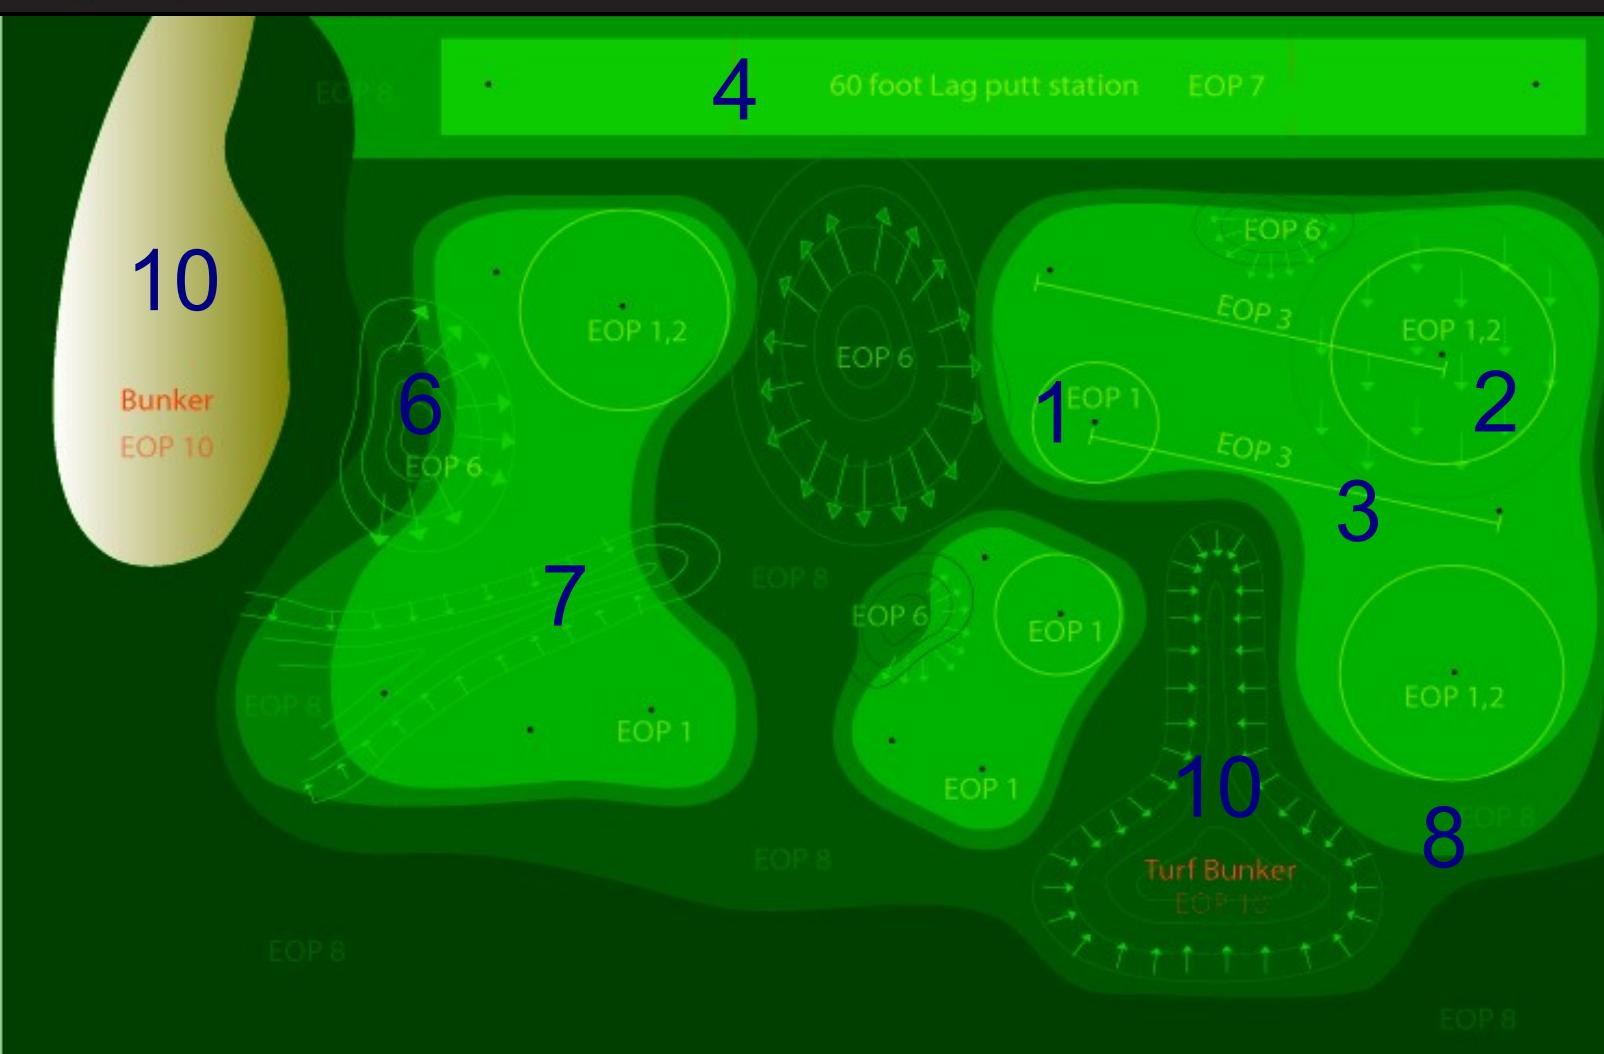

*Manufacturer Warranty: 15 year warranty is based on installation provided by SYNLawn Certified Installers. Warranties up to 12 years for non-certified installations.
